#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Election/Restrictions***

Applicant's election without traverse of Species II, in the reply filed on August 25, 2004, is acknowledged.

***Drawings***

The drawings are objected to as failing to comply with 37 CFR 1.84(i) & 37 CFR 1.84(p) because lines, numbers & letters are not uniformly thick and well defined, clean, durable, and black (poor line quality). Also, some characters are too small.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Hamasaki et al. (US 5,694,065, “Hamasaki”, hereinafter).

Regarding claim 15, Hamasaki discloses, a circuit, comprising:

a buffer (IV1, IV2);

a sampling circuit (IV0) having a switch (50, 60); and

a damping circuit (LPF1, LPF2) coupled between the buffer and the sampling circuit; wherein the damping circuit is adapted to reduce charge glitches when the switch closes (see abstract).

Regarding claims 16 and 17, Hamasaki discloses, that the damping circuit comprises a low pass filter (LPF1, LPF2) and the low pass filter is an RC low pass filter (Rn, Cn; Rp, Cp).

***Allowable Subject Matter***

Claim 18 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ehben (US 6,433,592 B1) discloses a method and apparatus for switching a field-effect transistor. Koch, II et al. (US 6,753,708 B2) discloses a driver circuit connected to pulse shaping circuitry and method of operating same.
